

## NEWS FROM YOUR ELKS MAJOR PROJECT . . .

Judy (Judy Linda, Occupational Therapist) is wonderful! Trevor's eating did not improve with therapy but his exposure and comfort with food and textures improved tremendously with Judy's expertise. Judy is very caring and was doing everything in her power to help Trevor begin to eat solids. We stumbled upon Clinic 4 Kidz, a feeding clinic that comes to our home and specialized in cases like ours. I can happily say that after three and a half months Trevor is eating almost as well as his peers. Trevor's advancements are credited to the feeding clinic, Judy and all of the caring people that helped us find answers along the way!

I am impressed with the improvement that my daughter, Jocelyn, has made. She currently started crawling. I'm very happy! (Denise Wilson, Physical Therapist)

We are so happy to see Candy (Candy Zinn, Pediatric Vision Screener) when she comes to our school. She is quick and efficient and yet is patient with each and every child. We all laugh and have a great time playing the "Pirate Game" with her. Many of our children remember her and are excited to be tested again. You couldn't send a better person for the job!!

Hedley (Hedley Uetake, Speech-Language Pathologist) is great. My daughter, Trinity, felt comfortable with her almost immediately. Trinity also is excited to see Hedley each week. Trinity loves the different, fun activities Hedley does each week. I think Hedley's ideas are great. With the time Trinity has spent with Hedley, I do feel she has already shown some improvement. I appreciate the in-home service and would like to thank the Elks of California and Hawaii.
